Objective

Actively seeking entry-level or new graduate software engineering opportunities. Available to start in May 2026.

Education

Master's in Software Engineering

Rochester Institute of Technology

05/2026

Rochester, NY

Relevant Coursework: Model Driven Development, Self-Adaptive Software w/ Reinforced Learning, Software Architecture

Bachelor's of Science in Software Engineering

Rochester Institute of Technology

05/2025

Rochester, NY

Relevant Coursework: Engineering Cloud Software Systems, Foundational Data Science & Analytics, Engineering of Software Subsystems, Engineering Secure Software

Skills

Programming Languages

Python, JavaScript, HTML, SQL, C++

Frameworks and Tools

React/NextJS, MongoDB, Postgres, Jest, AWS, Azure, Prisma, Dynamic 365

Professional Experience

Functional Architect

06/2024 – Present

CBS Technologies

- Designed and developed a prototype system for a lawn care company , rapidly learning and applying Microsoft Azure and Dynamics 365
- Trained team members to effectively use the system, providing hands-on guidance and operational support

Full Stack Developer

06/2024 – 07/2024

RIT Software Engineering Department

- Created a peer-evaluation feature to allow teams to evaluate each other in the senior portal
- Integrated AI to summarize and anonymize peer feedback, in order to prevent students from identifying the sources based upon writing style

Machine Learning CO-OP

06/2023 – 12/2023

Baxter International

- Designed and implemented an algorithm for predicting oxygen saturation virtually, achieving 85% accuracy
- Earned hands-on experience and skills in assisting in clinical trials such as data collection, patient monitoring, and protocols

Projects

HexaHive | Discord JS, MongoDB, Prisma

06/2025 – Present

Grad Thesis Project

- Developed **HexaHive**, a Node.js-based Discord bot supporting a game-theory-driven vulnerability trading simulation for thesis research.
- Structured the application for scalability and modular command handling using JavaScript and Node.js best practices.

NYS First Website | Next JS, Express JS, Azure, Google Analytics

09/2024 – 04/2025

Senior Capstone

- Project Manager of a team of 5 to design and develop new full-stack website for the FIRST Robotics Upstate NY Region
- Provided real-time statistic and website performance tracking using Google Analytics
